FLASHPATCH

Description and Application

CATEGORY

Skimming and Patching / Waterproofing

DESCRIPTION

A flexible waterproof resin bound crack filler for exterior use.

FEATURES

When dry, FlashPatch has excellent flexibility and durability. It can be used on masonry, wood, steel and has many other uses such as repairing damaged putty, replacing damaged tiles, waterproofing grouting, repairing ridging etc. FlashPatch is odourless, non-toxic and enviro-friendly.

SURFACE PREPARATION & APPLICATION

Surface Preparation

1. Clean damaged area removing all loose friable material
2. Apply a coat of Paintcor's AcrySeal to all areas of the crack and allow to dry.

Application Method

Patching:

1. Fill void with FlashPatch
2. Smooth product while still wet. Avoid sanding if possible.
3. If damaged area is more than 5mm deep, repair damage with sand, AcryLatex and cement or multiple coats of FlashPatch. Allow to dry thoroughly between coats.

Skimming:

Dilute FlashPatch with between 5-15% water. Using a trowel apply diluted FlashPatch to smooth finish. Allow 6 hours to dry.

CLEANING EQUIPMENT

Clean all equipment with water immediately after use.
