Ruscon

Description and Application

CATEGORY

Rust Converter.

DESCRIPTION

Ruscon is a water-borne, red rust converter.

FEATURES

-It is specially formulated to convert red rust on mild steel and galvanized iron into a tough resin coated converted surface which can be over-coated without removing rust back to bright steel.

SURFACE PREPARATION AND APPLICATION

SURFACE PREPARATION

Mild steel and galvanized iron

1. By wire brush or sanding, remove only loose or flaking rust. It is important not to remove all rust.
2. Wipe the treated area down to remove all dirt and sanding dust.

APLLICATION METHOD

1. Apply using a brush, roller or airless spray.
2. Apply one thin, even coat of Rustcon, ensuring that you cover all rust completely. Do not apply over previously painted area. Spot prime rust only.
3. Allow to dry for 4 hours at 25 degrees if using an over-coat with a water based primer such as Allprime.
5. Allow to dry for 12 hours at 25 degrees when using an over-coat with a solvent based primer.

Cleaning equipment

Clean all equipment with water immediately after use.
