WoodLusta Suede

Description and Application

CATEGORY

Wood treatment/Wood stain.

DESCRIPTION

WoodLusta Suede is an Alkyd polyurethane wood varnish formulated for the protection of interior wood, creating excellent hardness and flexibility.

FEATURES

- It can be used on floors, furniture, window frames and skirting.
- It has great resistance to wear-and-tear, foot traffic and to ring marks caused by cups and glasses (blanching).
- It is a multi-purpose interior varnish.
- WoodLusta is available as a clear varnish and in other various stains.

SURFACE PREPARATION AND APPLICATION

SURFACE PREPARATION

New wood

1. Sand the wood down to a clean, smooth finish.
2. Remove any sanding dust.

Previously varnished surfaces

1. Sand existing varnish down to a clean, matt finish.
2. Remove any sanding dust.

APPLICATION METHOD

1. Apply two coats of WoodLusta Suede.
2. Allow for a drying time of 6 hours in between coats.
3. Clean all equipment with Turpentine immediately after use.
