WOODLUSTA GLOSS

Description and Application

CATEGORY

Wood treatment.

DESCRIPTION

WoodLusta Gloss is an Alkyd Polyurethane wood varnish formulated for the protection of interior wood. It creates excellent hardness and flexibility.

FEATURES

- It can be used on floors, furniture, window frames and skirting.
- It has great resistance to wear-and-tear, foot traffic and to ring marks caused by cups and glasses (blanching).
- It is used as a multi-purpose interior varnish.
- It is available as clear varnish as well as other various stains.

SURFACE PREPARATION AND APPLICATION

SURFACE REPARATION

New wood

1. Sand the wood down to a clean, smooth finish.
2. Remove any sanding dust.

Previously varnished surfaces

1. Sand the existing varnish down to a clean, matt finish.
2. Remove any sanding dust.

APPLICATION METHOD

1. Apply two coats of Paintcor's WoodLusta Gloss.
2. Allow a drying time of 6 hours in between coats.
3. Clean all equipment with turpentine immediately after use.
